

Thrift Stamps and Clean Up Week

Thrift stamps, Thrift stamps and more Thrift stamps.

Every nickle is a counter in the big campaign which started today.

Two nickles make a dime, and every barrel of tin cans and rubbish makes a dime.

Up to noon Saturday the City Engineer is offering ten cents to every person who surrenders a barrel of tin cans collected from backyards, lanes and vacant lots. All that is necessary is to call the Engineer's office on the telephone, tell him where to send the Board of Works' teams and they will do the rest.

Last year many dollars were earned by industrious boys and girls, and the city was made cleaner and more healthy. Everybody benefitted.
